

Sandberg HDMI Switch

Do you have more HDMI devices than your TV has HDMI ports? In that case the Sandberg HDMI Switch is the solution for you! It allows you to connect up to three HDMI devices to the same HDMI input. Connect the switch to your TV with the enclosed HDMI cable and then connect your devices to the switch. Use the enclosed remote control and you won't even need to get up from the sofa when you want to switch between, say, the DVD player and games console – all you have to do is press a button on the remote control and the device selected becomes active.

The British magazine MicroMart has reviewed the Sandberg HDMI Switch (February 2009). They said:

"...A useful addition for those with multiple HDMI devices..."
